C. MACK ENDSLEY, Market Administrator

OCTOBER 1990

USDA Seeks Comment on Recommended Amendments to Louisville-Lexington-Evansville Federal Milk Marketing Order

The U.S. Department of Agriculture seeks comment on two recommendations for amending pooling provisions of the Louisville-Lexington-Evansville federal milk marketing order in Kentucky and southern Indiana.

Daniel D. Haley, administrator of USDA's Agricultural Marketing Service, said one amendment would have milk shipped directly from the farm to a milk manufacturing plant accounted for as a receipt of the city bottling plant normally receiving it.

Haley said the other amendment would, under certain conditions, limit a city plant's ability under the order to re-ship milk to a country plant. In determining the country plant's "pooling" status -- eligibility for benefits of regulation under the order -- milk re-shipped to the country plant would be offset against the country plant's shipments to the city plant in a given period.

"The recommended amendments address issues affecting distribution and resulting pricing of milk in a period of relatively short supply," Haley said.

"The shortage problem in this milk marketing area occurs in the late summer and fall, when milk production normally falls. At that time, there is not enough milk being made available to bottling plants to meet consumer needs for drinking milk," Haley said.

A principle of milk marketing orders is that farmers affected by them are paid from a pool of money received for their milk sold at different prices for different uses. To be eligible to be in the pool in the Louisville-Lexington-Evansville order, farmers must deliver milk to a city bottling plant, or to a country plant that in turn must deliver a minimum percentage of its receipts to bottling plants. Plants receiving milk on such conditions are called "pool plants."

"The recommended amendments address issues affecting distribution and resulting pricing of milk in a period of relatively short supply,"

-Daniel Haley

A situation has developed under the order where a country pool plant retains its eligibility for pooling status even though some of the milk it ships to city bottling plants is re-shipped back to the country pool plant for other than drinking use.

"Shipments to the city plant result in pooling the country plant -- making it and producers shipping to it eligible to share in the benefits of the marketing order -- but because of the re-shipment of such milk to the country plant, the milk does not end up being used by the bottling plant, where the demand for fluid milk indicates it should end up," Haley said.

The recommended amendments would correct the reshipment situation and would establish new minimums for the amount of milk that must be directed to fluid use in cities and yet allow the plants handling the milk to be considered for pooling benefits under the order.

The recommendations were published as a proposed rule in the Oct. 4 Federal Register.

CHANGE IN REGULATED HANDLERS

Federal Order 33 lost one handler while picking up three new handlers. Wayne Dairy located in Richmond, Indiana is again regulated in the Indiana order. Smith Dairy Products in Orrville, Ohio, a distributing plant located in the Eastern-Ohio Western Pennsylvania Marketing Area was regulated in the Ohio Valley Marketing Area. Smith Dairy had more fluid sales in the order 33 marketing area than in the order 36 marketing area. Smith was regulated in the

Ohio Valley market for September and November 1989.

The other two additions are supply plants, Beatrice Cheese at Shipshewana, Indiana and National Farmers Organization at McCartyville, Ohio. The last time there was a supply plant in the Ohio Valley Marketing Area was December 1986. That was the last month that Milk Marketing Inc.'s supply plant at Sardinia, Ohio was operating.

FLUID MILK SALES

July sales of fluid milk products in

federal milk order marketing areas and California were 0.6 percent below sales in July 1989. The 5.4 percent decrease in the sales of whole milk products more than offset the 3.2 percent increase in the sales of lowfat and skim milk products. On a regional basis, the changes in fluid milk sales were mixed - above the previous year in the southwest and farwest and lower in the northeast, southeast, and midwest. For January through July, fluid milk sales were 0.2 percent above the same period in 1989.

FEDERAL ORDER 33 MARKET SUMMARY FOR SEPTEMBER 1990

Gross Class I utilization averaged 4,391,182 pounds per day during September 1990. On a daily basis this was an increase of 9.9% from the previous month and 1.7% less than September 1989.^{1/}

The September 1990 Class I utilization of producer milk totaled 126,936,871 pounds or 56.2% of the reported producer receipts. This utilization percentage is 1.4% more than last month and 4.2% less than September 1989.^{1/}

The average butterfat test for gross Class I utilization was 2.1% for September 1990.

Receipts from 3,685 producers by 27 pool handlers regulated by Order No. 33 averaged 7,522,407 pounds daily for September 1990. On a daily basis this was 7.3% more than last month and 10.8% more than September 1989.^{1/}

Producers supplying the market increased by 439 from the August 1990 total and increased by 333 from September 1989. The daily average producer receipts per farm of 2,041 pounds were 119 less than the previous month. On a daily basis this is 15 pounds more than September 1989.^{1/}

The September 1990 Class I price was \$15.47 per hundredweight for 3.5% milk delivered to pool plants in Zone 3. This was 15 cents more than the August 1990 Class I price and \$1.67 more than the September 1989 price. Prices for Class I milk in parts of the marketing area other than Zone 3 reflect the specified location adjustment of minus 24 cents in Zone 1, minus 14 cents in Zone 2, plus 7 cents in Zone 4 and plus 15 cents in Zone 5.

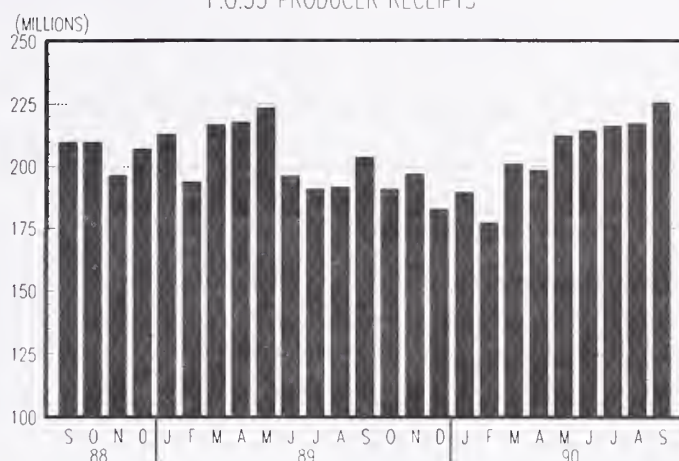

The Class II price for September 1990 was \$13.73. This was 4 cents less than the August 1990 Class II price and 63 cents more than the September 1989 Class II price.

The Class III price of \$12.50 for September 1990 was 59 cents less than the previous month and 60 cents less than the September 1989 Class III price.

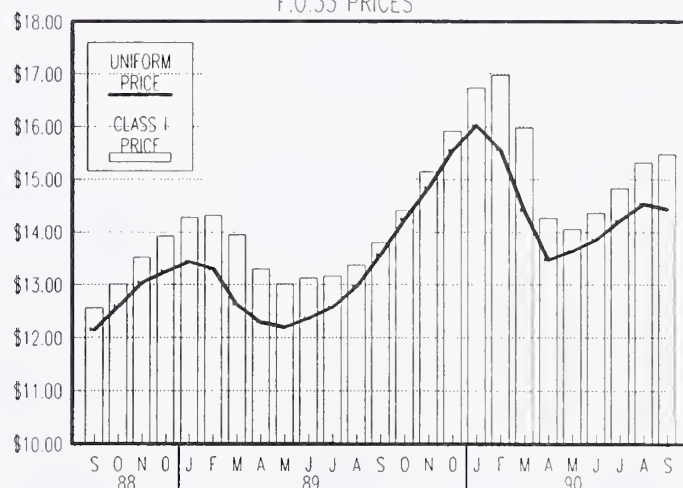

The October 1990 Class I price will be \$15.13 for 3.5% milk.

^{1/} Comparisons to previous periods are magnified due to changes in the handlers included in the pool.

FEDERAL ORDER 36 MARKET SUMMARY FOR SEPTEMBER 1990

Gross Class I utilization averaged 4,925,469 pounds per day during September 1990. On a daily basis this was a decrease of 7.5% from the previous month and 4.5% less than September 1989.^{1/}

The September 1990 Class I utilization of producer milk totaled 147,636,724 pounds or 55.9% of the reported producer receipts. This utilization percentage is 0.9% more than last month and 4.9% less than September 1989.^{1/}

The average butterfat test for gross Class I utilization was 2.1% for September 1990.

Receipts from 4,701 producers by 35 pool handlers regulated by Order No. 36 averaged 8,812,037 pounds daily for September 1990. On a daily basis this was 8.9% less than last month and 4.5% more than September 1989.^{1/}

Producers supplying the market decreased by 242 from the August 1990 total and increased by 26 from September 1989. The daily average producer receipts per farm of 1,875 pounds were 81 less than the previous month. On a daily basis this is 71 pounds more than September 1989.^{1/}

The September 1990 Class I price was \$15.43 per hundredweight for 3.5% milk delivered to pool plants. This was 15 cents more than the August 1990 Class I price and \$1.67 more than the September 1989 price.

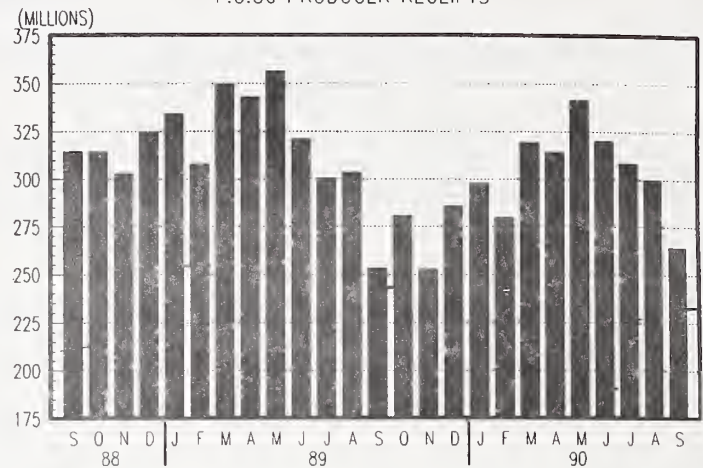

The Class II price for September 1990 was \$13.73. This was 4 cents less than the August 1990 Class II price and 63 cents more than the September 1989 Class II price.

The Class III price of \$12.50 for September 1990 was 59 cents less than last month and 60 cents less than the September 1989 Class III price.

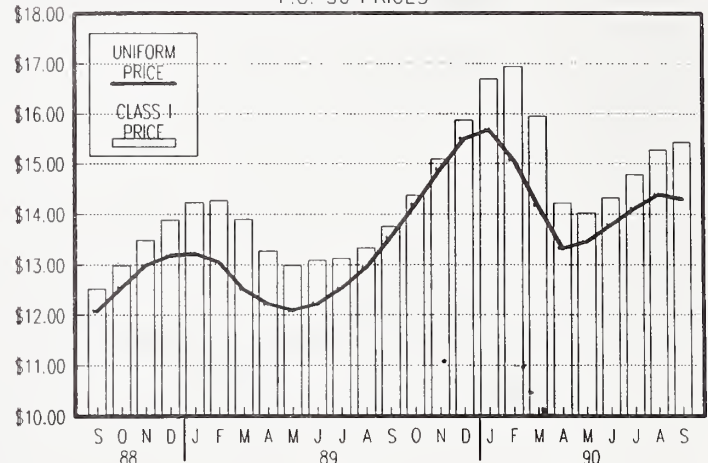

The October 1990 Class I price will be \$15.09 for 3.5% milk.

1/ Comparisons to previous periods are magnified due to changes in the handlers included in the pool.
